Disdik surakarta (proses)

The screenshot shows a VS Code editor interface. On the left, the Explorer sidebar displays a project structure for 'disdik-fileserver'. The 'src' directory contains 'pages', 'services', 'types', 'utils', 'app.css', 'App.tsx', 'main.tsx' (selected), 'vite-env.d.ts', '.gitignore', 'eslint.config.js', 'index.html', 'package-lock.json', and 'package.json'. Below these are 'README.md', 'tsconfig.app.json', 'tsconfig.json', 'tsconfig.node.json', 'vite.config.ts', and an 'image-context' folder. The main editor window shows the content of 'main.tsx', which is a TypeScript file defining a series of routes for a web application. The routes are defined as an array of objects, each with a 'path' and a 'Component'. The routes include 'file-explorer', 'file-backup', 'folder-inbox', 'file-inbox', 'shared-folders', 'shared-files', 'form-dapodik', 'form-nondapodik', 'sekolah', 'quota-template', 'homepage', 'homepage-dinas', 'qrcode-verification', 'qrcode-generation', 'settings', 'backups', and 'account'. The terminal at the bottom shows the command 'macbookair@MacBooks-MacBook-Air disdik-fileserver %'.
